Task
Develop a simple and attractive student digital portfolio website using HTML, CSS, and JavaScript. The portfolio should showcase your achievements, certificates, projects, and personal information in a professional way.

You will create the website using prompts to generate html, css and javscript and deploy the same on github only. Websites developed on lovable, bolt etc will not be accepted.

The portfolio must include the following:-

- Home: your photo, name, and short introduction.
- About Me: education, interests, goals, and strengths.
- Achievements: certificates, awards, and events with descriptions of each
- All relevant images must be uploaded
- Ai4A project, Design thinking project, ACE project must be included
- Coursera, netcad, yuva al certificates
- Projects: project screenshots, descriptions, and links.
- Gallery section: all photographs and certificates in one place
- Contact: email, phone number, LinkedIn, GitHub, or other social links.
- Any other information of interest which you wish to showcase to your future employer
-

Requirements

- Upload all files to a GitHub repository.
- Use your photographs and scanned certificates inside an images or assets folder.
- Add at least one extra feature of your choice, such as a dark mode toggle, animated section,

Upload
Snapshot of Folder structures on github
Github website link for access

The student should submit the following as evidence of completion of task

PRN_No Gitwebsite_Student submission.docx

Rubrics

Criterion	Description	3	2	1	0	Max
